One operating system for every team sport

Built by a sports operator. Proven in a live academy. Designed to scale across clubs, leagues and schools worldwide.

THE ASK

€50K

for 10% equity

Founder retains 90%
Investor helps fund MVP + go-to-market

INVESTMENT THESIS

An operator-built platform can serve team sports worldwide

145+

Built-in proving ground

€6,160

Capital-efficient MVP

single-club base system in Appendix B

100%

Founder-owned asset

custom IP, data and repositories under SIDIS draft

- The founder understands the buyer because he is the buyer.
- First revenue can come from the existing academy, then expand across sports.
- Ownership preserves licensing, white-label, fundraising and exit options.

Operating metrics supplied by founder; costs from SIDIS Appendix B dated 30 June 2026.

THE PROBLEM

Team-sport organizations run on fragmented tools and unpaid admin time

ADMIN CHAOS

Registration, rosters, attendance, schedules and documents live in separate systems.

REVENUE LEAKAGE

Late fees, manual invoices and weak follow-up make cash flow unpredictable.

POOR VISIBILITY

Parents, coaches and directors lack one reliable source of truth.

NO INTELLIGENCE

Most tools record activity; few turn operational data into useful decisions.

ONE WORKFLOW. EVERY TEAM SPORT.

One platform connects the entire organization

01

DIRECTOR

Revenue, compliance, teams, reporting

02

COACH

Roster, attendance, plans, messaging

03

PARENT

Registration, payments, schedules, documents

04

ATHLETE

Profile, development, content, opportunities

Football • basketball • rugby • volleyball • hockey • handball • cricket • school sports • academies • leagues

Core workflow: registration • payments • scheduling • rosters • attendance • communication • reporting

WHY NOW

A large software category is still missing the operator-built intelligence layer

$10.84B

Sports management software

2025 estimated global market

$19.15B

Projected market by 2031

11.07% forecast CAGR

55.4%

Youth participation

of U.S. ages 6–17 played in 2023

The opportunity is not another team chat app. It is a sport-agnostic operating system combining administration, embedded payments and athlete development—with configurable workflows for each sport.

Sources: Mordor Intelligence (10 Mar 2026); Aspen Institute Project Play 2025.

BUSINESS MODEL

Recurring software revenue compounds with every club and athlete

Club platform	**€149 / club / month**	Core administration and role-based access
Active athlete	**€2 / athlete / month**	Scales with club usage
Payments	**Up to 1% platform fee**	Optional payment convenience and reconciliation
Premium modules	**€49–199 / month**	AI assistant, analytics, placement, multilingual tools
Onboarding	**€500–2,000 once**	Migration, configuration and training

Illustrative launch pricing; final pricing to be validated with design partners.

GO-TO-MARKET

Prove locally, expand sport by sport, then scale by region

01

PROVE

Deploy inside DLang/SPSA; document payment recovery, time saved and adoption.

02

PILOT

Onboard 5–10 clubs across basketball, football, volleyball and other team sports.

03

PACKAGE

Create sport-specific templates, federation rules, onboarding and referral playbooks.

04

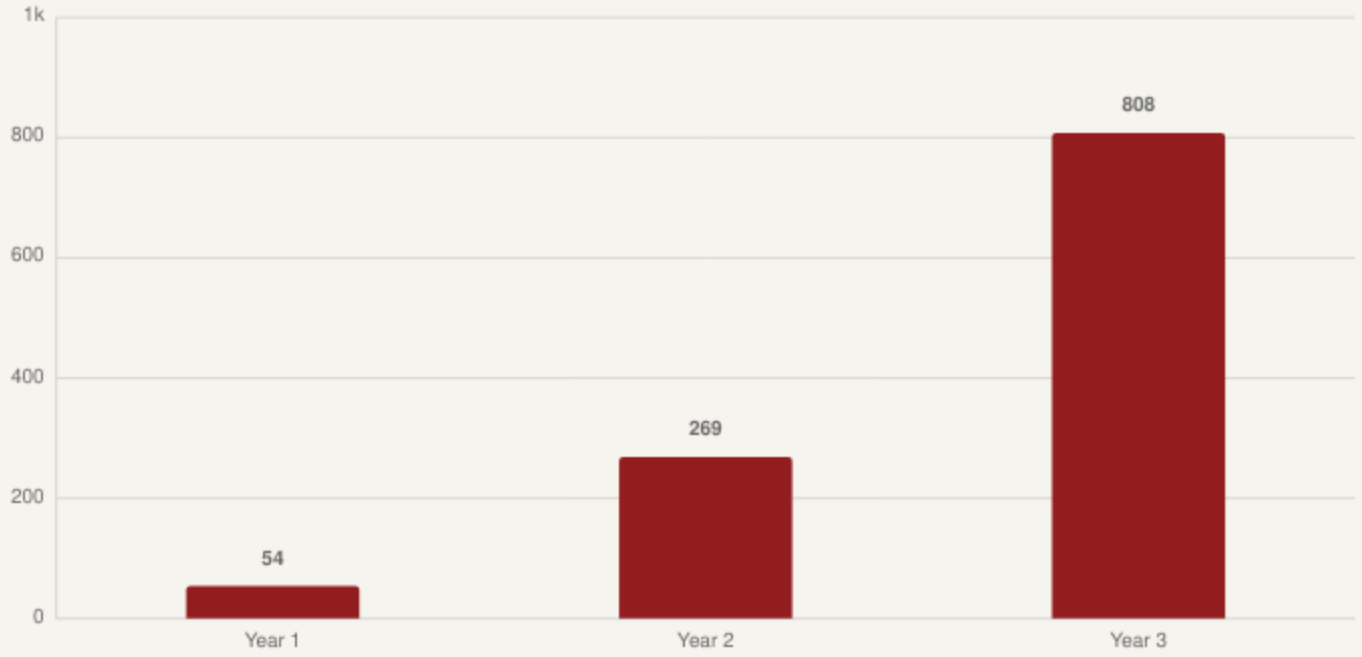

SCALE

Sell through schools, academies, leagues, federations and multi-club operators globally.

North-star proof: clubs recover more revenue and save more admin time than the monthly subscription costs.

ILLUSTRATIVE ECONOMICS

150 clubs create a credible path beyond €800K ARR

10 clubs

Year 1

~150 athletes per club

150 clubs

Year 3

€449 average monthly revenue / club

Model: €149/club/month + €2/active athlete/month; excludes onboarding, payments and premium modules. Not a forecast or guarantee.

THE INVESTMENT

Capital to build, launch and win the first market

€50,000

Investment

single strategic investor

10.0%

Equity offered

€450K pre-money / €500K post-money

10 clubs

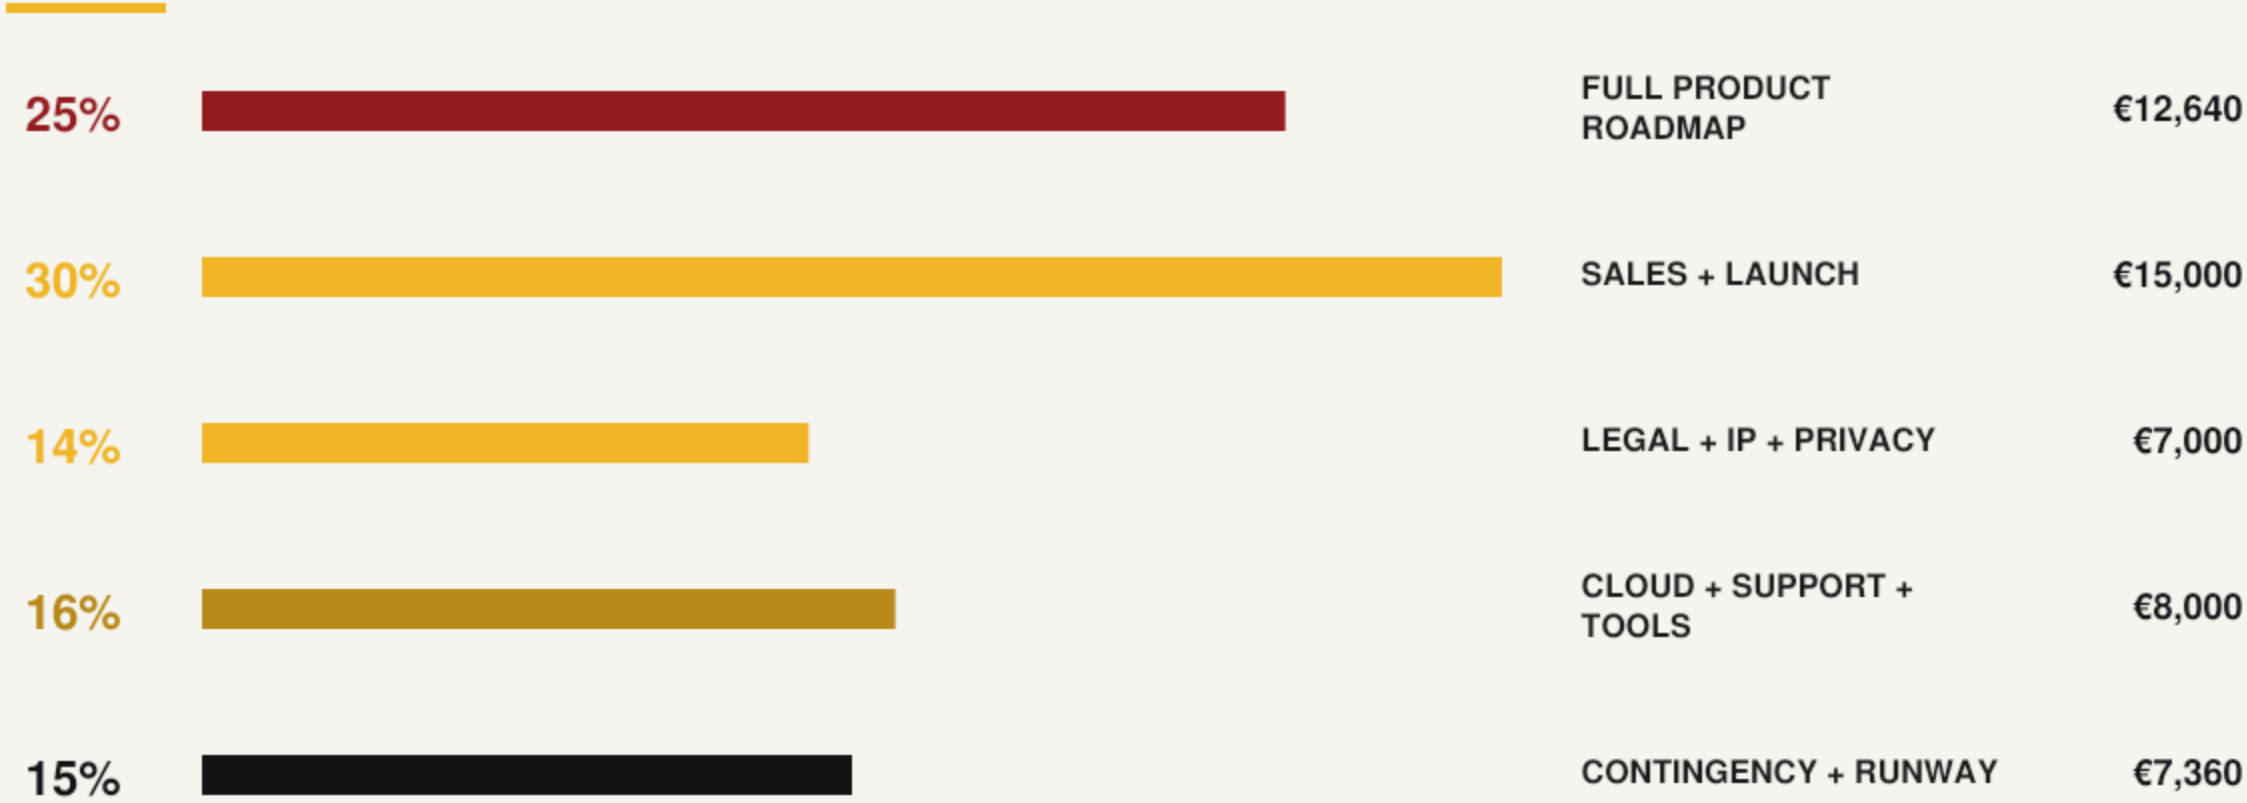

12-month objective

paid external organizations

The round completes the founder-owned product roadmap, launches the platform inside a live operating environment, and funds the commercial path to recurring multi-club revenue.

USE OF FUNDS

Every euro moves the product toward paid proof

Illustrative allocation of the €50,000 investment round.

EXECUTION PLAN

Twelve months from founder-owned build to repeatable club sales

1	MONTHS 0–2	Complete and test the core single-club platform
2	MONTHS 2–4	Launch with the founder's live 145+ athlete organization
3	MONTHS 4–7	Measure adoption, payment recovery and administrative time saved
4	MONTHS 6–10	Onboard the first paid multi-sport design partners
5	MONTHS 10–12	Reach 10 paid clubs and establish repeatable onboarding

THE DECISION

Back the global multi-sport platform

€50,000 for 10% equity

- Complete the founder-owned multi-sport platform
- Launch inside a live 145+ athlete operating environment
- Convert proof into 5–10 multi-sport club pilots

12-MONTH TARGET

10 paid clubs

Validated retention, ROI and scalable onboarding
